

Solid Waste Facility Permit Renewal of Modern Landfill, Lewiston, NY - Fact Sheet

Applicant: Modern Landfill, Inc.

Facility Location: 1445 Pletcher Road, Model City, NY 14107

NYSDEC Application No.: 9-2924-00016/00043

Modern Landfill has applied to the New York State Department of Environmental Conservation (NYSDEC) to renew its existing Solid Waste Facility Permit under 6 NYCRR Part 360. A Public Participation Plan (PPP) has been developed as part of the application process per recent NYS regulatory requirements.

Why is the Permit Being Renewed?

Solid waste facility permits are renewed every 10 years throughout a landfill's operating life. This renewal is normal course of operations and allows continued operation of the landfill under its permit conditions.

What Does the Renewal Mean for the Community?

This permit renewal does not propose an expansion or increase in the amount of waste received at the landfill. Existing operational procedures and environmental controls will continue to remain in place.

Public Participation (How can I participate in this review process?)

Community members are encouraged to ask questions, provide feedback, or submit comments during the permit review process and can reach out to the Project Contact or to the NYSDEC (both contacts are listed below).

Learn More

To learn more about the renewal, application materials and supporting documentation are available online at <https://moderncorporation.com/projects/>.
